A photograph of a laboratory setup for an aromatic heat bath. The scene is dimly lit with a strong red glow. In the center, a rectangular stainless steel tray is filled with numerous small, light-colored, spherical objects. Above this tray, a vertical stainless steel column is suspended, from which a fine mist of red liquid is falling. Several other similar trays are visible in the background, also filled with the same objects. The overall atmosphere is scientific and focused on the process of aromatic diffusion or treatment.
